

# ACKNOWLEDGEMENTS

The authors in this case had the task of compiling into an overall format, all the field studies pertaining to limnology which were part of the Okanagan Basin Study. Thus, most of the original work and data is that of other investigators. The major manuscript reports used in this compilation are listed in a section of the References portion of the supplement.

This supplement could not have been compiled without the cooperation, support and hard work of all involved in the Okanagan Basin study limnology program as well as the Study Office staff in Penticton. The assistance of those listed below as well as many others too numerous to mention, is here most gratefully acknowledged.
