

What can we learn from Las Vegas?

Join **Doug Bennett** from the Southern Nevada Water Authority and other industry experts to learn about leading-edge water conservation trends and technologies.

Whether you're a community decision-maker, a water professional, or a concerned citizen, this event is for you! Hosted by the Irrigation Industry Association of BC, the Okanagan Basin Water Board, and Okanagan WaterWise, this interactive session will explore:

- Water modelling and planning strategies
- Conservation regulation and enforcement tools
- Landscape and irrigation design standards
- Water budgeting and rates.

Special attention will be focused on how Okanagan water stakeholders—including regional and municipal governments, water-related businesses, and other users — can prevent the water challenges that have plagued other drought-prone areas.
