### Water Works

---

Water is an important resource to everyone and quality matters...that was the message delivered at a public forum Monday by the Okanagan Basin Water Board and UBCO in recognition of World Water Day. Executive Director of the OBWB Anne Sears says there are many different things that impact water quality.

Things you can do to improve water quality include taking you car through a car wash...not doing it in your yard. Plus not dumping solvents down the grates and picking up after your animals outside.
